# Executive Coaching & Leadership Mentoring through executive coaching and supervision

*Time & Tide*

The ILM Level 7 Programmes in Executive Coaching and Leadership Mentoring are amongst ILM's most senior qualifications. They give managers and consultants, (both practising and aspiring), the opportunity to develop as leading practitioners in their field. They will help them gain a detailed understanding of the coaching contract, the knowledge and skills required to deliver results for individual clients and the opportunity to put these into practice whilst receiving coaching and supervision. They are delivered through a blend of learning that is tailored to the needs of each student. They are demanding programmes but the rewards can be very high.

### The Programmes

The programmes are centred on delivering executive coaching or leadership mentoring in the workplace. Students design an executive coaching or leadership mentoring programme that will have real impact in their workplace, or an organisation they are working with in a freelance capacity. They then use reflective practice to develop and improve performance. The programme offers coaching and supervision sessions, set readings, individually defined CPD, online learning and reflective reviews. Students develop their executive coaching or leadership mentoring performance supported by their coach, focusing on achieving high levels of leadership impact for their organisation or clients.

### Progression routes

Level 7 qualifications are prestigious awards in their own right and are amongst the Institute of Leadership and Management's most senior awards. They also provide students with up to 45 credits at Level 7. These credits, which are at post graduate level, can be used as a stepping stone into advanced entry into Masters level qualifications. ibp academy has developed strong links with a number of universities and can facilitate advanced entry to MSc and MBA qualifications, providing exemption from the entry requirements of the universities.
